## Activity 1: Display Demographics

Objective
Create a program to display the contents of your demographics.

Implementation Steps

1. **Create a new C# Console Application.**
2. **Define variables** to store demographic information:
   - `Student ID`
   - `Full Name`
   - `Nick Name`
   - `Gender`
   - `Year Level`
   - `Home Location`
   - `Course`
   - `Mobile No.`
   - `Personal Email`
3. **Assign example values** to these variables.
4. Use `Console.WriteLine` to display the values of each variable on the screen with appropriate labels.

```
Activity-1 [Display Demogra

Demographics Program by [Your Name]

Student ID       : 202310001
Full Name        : John Michael Reyes
Nick Name        : Mike
Gender           : Male
Year Level       : 3rd Year
Home Location    : 123 St. Greenfield, Metro City
Course           : Bachelor of Science in Information Technology
Mobile No.       : +639123456789
Personal Email   : mike.reyes@example.com
```
